

Tabletop Vacuum/Gas Pouch Sealer

The **PVT MED** is an economical, flexible and validatable tabletop vacuum pouch sealer with gas flush capabilities. It is ideal for those medical packagers with limited space, budget or production requirements who need the security of a medical vacuum sealer.

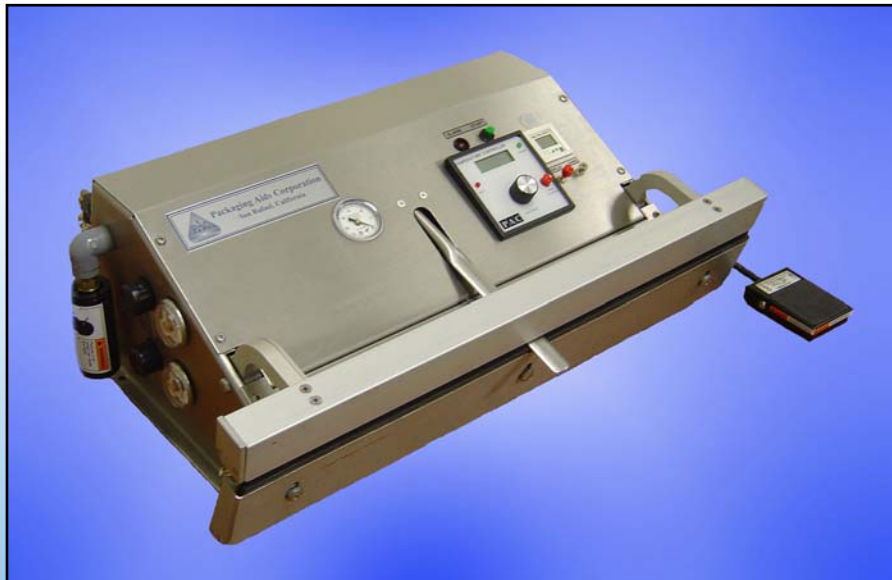

Available in three sealbar lengths, the **PVT MED** comes with a programmable pressure switch; Suretemp temperature controller; independent vacuum, gas, seal, and cool timers; digital display; alarm system; verification ports; and ported exhaust.

Standard Features & Benefits

PVT MED-A (single sided)

PVT MED-B (biactive)

- Cost effective, validatable, and flexible impulse sealers for low volume medical and pharmaceutical applications.
- Choice of single sided sealing for lighter materials or biactive seals for laminates, foils, and heavier materials.
- Choose between models with seal lengths of 20", 25" or 30".
- Jaw selector switch (PVT MED-B) allows heating with top or both jaws.
- Programmable digital controls and alarms for temperature and pressure, each with digital readout.
- Alarm system will abort cycle if pressure or seal temperature is out of preset range.
- Digital timers for each stage of vacuum, gas flush, seal, and cool with 0.1 second increments from 0.0 to 9.9 seconds.
- Verification ports permit calibration and verification of seal parameters
- Ported Exhaust combines all exhaust air into one port for venting outside clean room
- Hands free foot switch activation.

Specifications:

Seal Bar Length	20", 25", and 30" lengths
Seal Width	5/16"
Electrical	115 VAC
LP Air requirement	110-120 psi
Dimensions	23"-33"W X 15¾"D X 8" H

Options:

Seal only switch	Multistage capability
0-99 second vacuum cycle timer	Vacuum level sensor
Stainless Steel Cabinet	Workshelf or Stand
